SUMMARY

Full stack developer who designs and builds complete web products: React and Next.js on the front end, Node.js/Express and FastAPI on the back end, PostgreSQL for data. Built a multi-tenant SaaS with paid memberships and an AI-assisted monitoring dashboard. Looking for a remote full stack developer role.

PROJECTS

OnePlace – Community & Creator Platform
React, Vite, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS

- Built with a partner a multi-tenant SaaS where creators sell access to paid private communities, with several pricing models and a full membership and subscription lifecycle.
- Implemented JWT authentication in httpOnly cookies, a course system with video resume, creator analytics and a platform admin dashboard.

Rackmind – AI-Assisted Data Center Monitoring
FastAPI, Next.js, Groq API

- Built a monitoring dashboard with incident management over simulated data-center data.
- Added LLM-powered incident diagnosis through the Groq API.

Loupe – Website Audit Tool
Next.js, TypeScript, Tailwind CSS, shadcn/ui, Google PageSpeed Insights API

- Analyzes any website URL and produces a prioritized report on SEO, performance, accessibility and technical issues, written for small business owners.
- Shareable report links, with rate limiting and caching to keep the tool fast and stable.

WORK EXPERIENCE

Prologic Tunisie | 2025
Full Stack Developer Intern

- Built a task management application with Angular, Express.js and MongoDB, from the user interface to the REST API.
- Designed and optimized the database structure behind the application.

SKILLS

Frontend: React, Next.js, Angular, TypeScript, JavaScript, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT authentication
Databases: PostgreSQL, Prisma, MongoDB
Tools: Git / GitHub, Postman
